

Solar Lighting Applications

Area Lighting

This 36 watt unit only consumes 26.4 load watts. Area illuminated is over 100' by 100', and can be seen for 3 miles across lake. Dual units can illuminate up to 1 acre in rural areas, where ambient light is low, and 1/2 acre in suburban areas.

Sign Illumination

Our #W1PL18DC illuminates this sign that is sized 16' (w) x 8' (h).

Interior Applications

This unit is controlled by a motion sensor set for 30 seconds. Listed UL® "Wet Location", and bug/dirt proof.

Billboard Lighting

This billboard is 16' high by 60' long, and uses only 8 - #W1PL36DC units or a total of 17.6 amps @ 12VDC, + 1PL13 watt lamp in ET's finger.

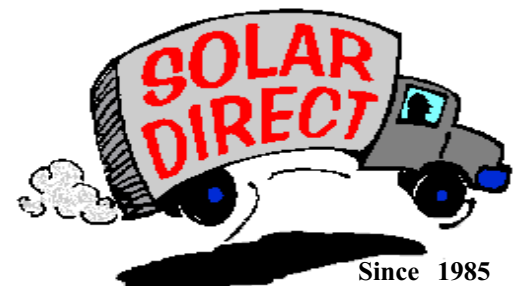

Note the even illumination both vertically as well as horizontally. This can only come from our scientifically shaped reflector, and the proper application of product.

FIXTURES - GENERAL DESCRIPTION

Double 15 Watt or Single 30 Watt Lamps. Precision-formed, highly polished aluminum reflector, scientifically shaped to produce optical magnification. Water clear acrylic lens is break-resistant, will not discolor in sunlight, permits maximum light transmission. Gasketed. Clear anodized aluminum housing with cast aluminum ends, blends with landscape and surroundings. Furnished with 360° conduit type swivels. Conduit or stake mount. UL® listed. Other sizes available.

- Weatherproof • Less Heat
- Less Wattage • More Light
