Dear Daniel:

The U.S. Green Building Council would like to congratulate you for successfully meeting the challenge of the LEED® 2.0 Professional Accreditation exam. In honor of your achievement and in appreciation of your participation in fostering sustainable design and construction, we are pleased to present you with the enclosed certificate.

You have earned several advantages upon becoming a LEED 2.0 Accredited Professional. Your LEED registered building projects will benefit from your knowledge of green building and the LEED Green Building Rating System, and will also be awarded the corresponding LEED point for using an Accredited Professional on the design team. You are hereby granted use of the "LEED® 2.0 Accredited Professional" and "LEED® AP" titles for your business cards and resume. Use of the LEED logo is not permitted, as it is reserved for use solely by USGBC and LEED Certified projects. Your name, e-mail address (or phone number if no e-mail address was provided), city, state and your company name are now listed on our Web site (see the link on www.leadbuilding.org) in order to help potential clients get in touch with you and your services.

We look forward to seeing your building projects become registered and certified under the LEED Rating System as we further our common mission of transforming the building industry and creating a greener world for future generations.

Sincerely,

S. Richard Fedrizzi
President, CEO and Founding Chairman
